

CR 253 4W

PALFINGER

LIFETIME EXCELLENCE

**FLEXIBLE & VERSATILE IN CONFINED SPACES
AND IN ANY DIRECTION**

- Perfect handling of heavy loads and long items
- Ready for immediate use, always and everywhere
- Maximum operational reliability and low operating costs
- Efficient work due to outstanding maneuverability in tight spaces
- Best possible overview

FIRST CLASS IN DESIGN AND PERFORMANCE

HIGHLIGHTS

NEW IMPROVED STEERING BEST MANEUVERABILITY

180 ° steering angle means quick and comfortable working even in the tightest spaces.

PROTECTED CYLINDER HIGH DURABILITY

The piston rods of the steering cylinders are only extended in 4-way-mode. During transportation on the truck and in normal operation they are in the cylinder housing and thus optimally protected against external influences.

OPTIMISED ALL-WHEEL DRIVE FOR ALL TERRAIN

The switchable diff-lock enables optimal driving on almost any surface.

4-WAY DRIVE MODUS RAPID SWITCH OVER

By operating the control lever, the 4-way mode can be quickly and conveniently activated.

UNIVERSAL MOUNTING SAFELY AND QUICKLY

Safety in use thanks to patented load-holding valves. Easy and fast in the ideal parking position.

KTL + POWDERCOATING LONG TERM VALUE PRESERVATION

Extensive surface preparation and complete cathodic dip painting with a final powder coating process.

**NEW MAST DESIGN
IMPROVED VIEWING**

The new FEM 3 fork carriage improves the driver visibility of the load and therefore increases safety when working.

**NEW LOOK
MODERN COLOURING**

Over head guard, covering panels and seat console with KTL + Powder coating in the colour anthracite thus making dirt less visible.

**LOAD SUPPORTS
PERFECT LOAD STABILISATION**

Optional wide load supports enable secure manipulation of longer loads.

Our solutions for driver demands ...

COMFORT SEAT

Allows the driver fatigue free and efficient working.

LARGER ROOF TOP

More comfort and better weather protection for the driver.

GAS/ACCELERATOR PEDAL

New arranged ergonomic pedals to guarantee precise and fatigue-free working.

GROUND CONTROL (OPTIONAL)

The driver no longer needs to climb onto the forklift to disassemble it from the lorry.

IGNITION KEY POSITION

Possible from the ground position, the driver no longer has to climb up to start the engine.
